

TRR 266 MINI CONFERENCE

THURSDAY 30 SEP - FRIDAY 1 OCT 2021

LOCATION: PADERBORN UNIVERSITY // WEBINAR*

Accounting for Transparency and Capital Markets

We kindly invite you to the inaugural mini conference “Accounting for Transparency and Capital Markets” of Projects B05 and B09. This mini conference aims to bring together researchers interested in capital market research and allows TRR 266 members to receive constructive feedback on their work. The program will provide various opportunities to discuss the progress of research projects and future collaborations. We explicitly invite researchers with different methodological expertise.

The mini conference intends to disseminate current research projects investigating the role of transparency in equity market or debt market. In particular, we invite TRR 266 members to submit developed papers for paper

sessions or early stage research for brown-bag presentations. In order to ensure valuable feedback, each presenter in a paper session will be assigned a discussant, followed by a joint Q&A session. Brown-bag presentations will feature an open discussion.

We are pleased to announce David Veenman from the University of Amsterdam as our keynote speaker.

Submission (June 30th, 2021)

Submissions from all methodological angles (archival, experimental, field data, etc.) are highly welcome. The deadline for submission is June 30th, 2021, but early submissions are encouraged. Please submit your paper to the TRR 266 mini conference [here](#).
